Education

Ohio State University

Ph.D. in Computer Science and Engineering

Columbus, OH

Aug 2021 – Aug 2026

Dissertation: *Answering Under Uncertainty: Abstention, Ambiguity, and Recoverability* (degree conferred Aug 2026)

Advisor: Prof. Jim Davis; Minors: Mathematics and High-Performance Computing

GPA: 3.70

M.S. in Computer Science and Engineering

Aug 2021 – May 2025

Ohio State University

Columbus, OH

B.S. in Computer Science and Engineering with Honors

Aug 2017 – May 2021

Minor: Mathematics; Scholarships: Maximus, Ten-Hai Lai, Ansel, Name and Seal

GPA: 3.86

Experience

Computer Engineer II

May 2025 – Present

DCS Corporation / Air Force Research Laboratory, Dayton, OH

- Build paired-outcome evaluation pipelines for retrieval-augmented QA, measuring when revision repairs an answer or harms a correct one. Develop and evaluate LoRA fine-tuned models using PyTorch, Hugging Face, and Slurm.

Graduate Research Associate, Computer Vision Lab

Aug 2021 – Aug 2026

Ohio State University, Columbus, OH

- Assessing the Role of Imagery in Multimodal Machine Translation** (WMT 2024): introduced ImageCoMMuTE metrics separating visual understanding from final translation decisions.
- Naturally Constrained Reject Option Classification** (MVA 2025): developed Binomial-CDF reject-option constraints with per-class thresholds across synthetic, image, and text datasets.
- Learning When to Say “I Don’t Know”** (ISVC 2022, Springer Best Paper Award): learned per-class softmax thresholds for abstention without user-defined rejection costs.

Graduate Teaching Associate / Course Grader, Ohio State University

Aug 2023 – Dec 2025

- GTA through May 2025, then course grader through Dec 2025; machine learning and NLP coursework and Excel-based computing labs.

Graduate Research Intern

Summers 2022–2024

Air Force Research Laboratory, Dayton, OH

- Summer 2024: Built and evaluated self-supervised vision models using distributed, containerized training workflows.
- Summer 2023: Developed Reject Option Beam Search to improve machine translation quality at large beam widths.
- Summer 2022: Built the end-to-end training procedure for Naturally Constrained Reject Option Classification.

Undergraduate Research Intern, Air Force Research Laboratory

Summers 2020–2021

- Temporal Satellite Imagery** (ICCV Workshop 2021): built an OpenStreetMap-guided Python pipeline for remote-sensing change detection and classification datasets.

Selected Peer-reviewed Publications

Technical Skills

Skills: LLM evaluation harnesses, selective prediction and abstention, calibration (ECE, Brier), RAG, LoRA; Python, PyTorch, Hugging Face, vLLM, FAISS, Git, Slurm, Singularity, LaTeX

Service: Reviewer for ICCV 2023, CVPR 2023, ECCV 2022, CVPR 2022; volunteer, HackOHI/O 2023
